2024 THUNDERSTONE ROSÉ

Rosé is cherished the world over. Its style is varied, expressive, and joyful. Perfected in Provence, it has since evolved across regions and winemaking philosophies, but always remains rooted in its ability to spark immediate connection.

This Rosé is crafted entirely from Grenache, planted specifically for Rosé production at Thunderstone Vineyard in the Royal Slope AVA. A sustainably farmed, high-elevation site with diverse soils, Thunderstone brings lift, texture, and nuance to the finished wine.

Harvested early on the morning of October 12th, the fruit was gently pressed upon arrival at the winery, then fermented and aged entirely in stainless steel to preserve purity, freshness, and aromatics. It was bottled on June 11th, 2025.

This rosé speaks to both heart and mind... delicate yet full of verve, with an electric core and a refined, mineral-driven finish.

“This is 100% Grenache, stainless steel fermented and sourced from a northern vineyard. Grenache gives it a bit more chunky concentration than, say, a Pinot Noir rosé, but without any of the hard tannins that can be found in a rosé from a heartier red grape. Tart and mouth-filling, with good grip and length, this is a fine all-purpose rosé that could power through that Thanksgiving turkey and take the cranberry sauce for a ride.”

91 points, Paul Gregutt, Northwest Wine Guide
